

Annual Report 2018 – Buildings and Grounds

The 2018 season has been very busy around PYC's buildings and grounds with some crazy weather to start this season that has carried throughout the summer and hoisting 3 larger regattas it has been challenge but things worked out great, thanks to a good number of people. To start with, thanks to John Grignon and his staff, who have been working diligently throughout the season to keep the grounds looking great. Many thanks go to the larger and great group of volunteers, both in the water and on land, that make pier-in a success this spring despite the snow and cold weather. We continue to be blessed with great volunteer efforts every spring, summer, and fall to keep the club looking great. Please consider joining us for pier in and out, if you don't already do so on September 29th. Yes it's work, but there's great camaraderie and a true sense of accomplishment when the work is done. Hope to see you there.

2018 was a year of general maintenance and some new projects. In the routine maintenance the pier had a number of repairs need and the parking lots are being resealed and striped. As for new projects the sheds and grill area had new siding installed this spring and a new sand volleyball court was added. The volleyball court was installed with a lot of help from a number of people. In that group I need to give a special mention and thank you to Matt Weber for all he is efforts with that project. So THANK YOU Matt.

The Buildings and Grounds committee continues to investigate long-range goals such as a replacement pier, and more. If you have suggestions for long-range goals related to Buildings and Grounds, please share them with a board member!

Thanks for your help and support in 2018!
